EZCon®

Special Features

- 1 Adopt RF wireless technology, no need for internet connection. Signals are delivered faster without delay.
- 2 Self-naming system, easy to identify and to control.
- 3 Local On/Off with Hot key control.
- 4 Able to control single, group or all the power switches.

Applications

All kind of lighting, fan, power strip, adapter socket, in wall socket, roll-up door, electric curtain, and electronic lock.

Advantages

- 1 Smart remote controller can integrate up to 2000 electrical equipments / circuits.
- 2 Three-stage adjustable dimming control functions for lighting or fan.
- 3 Patented design: one key turn on/off near-side devices.
- 4 RF signal has no direction issue and the control distance is up to 150M.
- 5 The smart remote controller is compatible with all the EZCon series products. No upgrade fees.
- 6 No overheat problem, maintenance free.
- 7 Private network provides high security when using the EZCon products.

IN WALL DUAL OUTLET SOCKET

EZCon®

Patented

- Make device smarter
- Save energy and power
- Provide fire safety
- Over current protection

Special Features

- 1 More convenient to use. No need to unplug power cord every time.
- 2 Each outlet can be named which makes corresponding electrical appliance easier to manage.
- 3 Over current protection feature offers better security.

Applications

All kind of electric appliances

Advantages

- 1 Traditional appliances are upgraded and turned smart when using EZCon smart in wall socket.
- 2 Remotely turn on/off the power of in wall socket by using EZCon smart remote controller. More convenient to use and save power when electric devices are truly turned off.
- 3 Avoid frequently unplug power cord and extend the life span of electrical appliance.
- 4 Use V0 level high quality fire prevention material to assure safety and reliability.
- 5 LED indicator shows blue under normal condition and will turn blinking red if over current occurs. The power will be cut off if that is the case.

Thoughtful design

LED indicator shows blue under normal condition and will turn blinking red if over current occurs. The power will be cut off if that is the case. Provide the users with all the protection they need.

ELECTRONIC DOOR LOCK CONTROLLER

EZCon®

- Simple installation
- High compatibility
- Safe and reliable
- Convenient to use
- Easy maintenance

Special Features

- 1 No name brand door lock required for easy installation.
- 2 Patented design and unique encryption system provide high security.
- 3 Easy to remember with self-naming system. No need for actual door keys.
- 4 Remote control distance up to 10M using EZCon smart remote controller.

Advantages

- 1 Only recoding is needed if the EZCon smart remote controller is lost. No need to change the whole set of door key control unit.
- 2 Self-naming with 500 ~ 2000 sets of rolling code key to provide convenience and high security.
- 3 Exclusive patented remote authorization method provides adding or deleting access right anytime. Convenient, cost saving and more safe.

Applications

Home \ Office \ Hotel

TEAM YOUNG TECHNOLOGY CO., LTD

Convenience

- Hot key design
- Self naming, easy to use
- Integrate other remote controllers
- One smart remote controller can control up to 2000 electrical equipments / circuit

Simple installation

- No change to existing wire setup
- No need for drill holes or rewiring
- No repairing or repainting for wall space

Security

- No Hacker
- Good helper for night patrol

Reduce cost

- No need for server
- No need for internet
- No need for rewiring
